Travel back in time and retrace the steps of the **Children of Israel** as you tour a **Life-Sized** reconstruction of the **Old Testament Tabernacle**. Learn the treasure trove of meaning behind the materials, measurements, and architecture of this historic place of worship. Discover how every aspect of this amazing piece of history is symbolic of the ministry, death and resurrection of the Lord Jesus Christ. We hope that this experience will point people to salvation provided by the shed blood of the lamb.

This Tabernacle took three years to build. The Tabernacle Courtyard is 75' by 150'. The courtyard fence made of linen imported from the Czech Republic is 7 1/2' high and 395' long. The Tabernacle has four 2000 Sq. Ft. coverings. The first is of linen with a host of angels hand embroidered on, the second is made of goat skins imported from Africa, the third is made of ram skins imported from New Zealand and hand-dyed red. According to the Old Testament the fourth covering was badger or porpoise skin, we have used a grey vinyl for our portable. Realizing it would be financially impossible to use pure gold and silver for our replica, we used gold and silver anodized metal. The golden Lampstand and Laver were fashioned out of brass and imported from Egypt.
